

MOAZ MOHAMED ELDEEB

AI Engineer | Machine Learning Engineer

engineermoaazeldeep@outlook.com | 01061861640 | linkedin.com/in/mo3az-mohamed-2544a0431/ | github.com/eng-Mo3aZzz

PROFESSIONAL SUMMARY

AI and Machine Learning student with practical training in Artificial Intelligence, Big Data, and Data Analysis. Hands-on experience building and evaluating machine learning models using Python, Pandas, NumPy, Scikit-learn, and TensorFlow, with experience in data preprocessing, visualization, imbalanced-data handling, hyperparameter tuning, and model evaluation. Seeking an AI Engineer or Machine Learning Engineer internship/junior opportunity.

EDUCATION

Bachelor of Artificial Intelligence — Faculty of Computers and Artificial Intelligence, Zagazig University

2023 – Present | Expected Graduation: 2027

Grade: Good

TRAINING EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) — Artificial Intelligence | 6 months | 2026

- Studied core Artificial Intelligence concepts and Data Analysis.
- Applied theoretical concepts through practical projects using Python and data analysis tools.

Huawei ICT Academy — Big Data | 1.5 months | 2026

- Studied Big Data concepts and tools for large-scale data processing and analysis.
- Explored Huawei technology solutions and the integration of Big Data systems with Artificial Intelligence applications.

National Telecommunication Institute (NTI) — Artificial Intelligence | 1.5 months | 2026

- Developed practical knowledge of Artificial Intelligence applications and Data Analysis.
- Built and evaluated Machine Learning models through practical training.

TECHNICAL SKILLS

Programming: Python, C++, SQL

Machine Learning & AI: Scikit-learn, TensorFlow, Machine Learning, Classification, Model Evaluation

Data Analysis: Pandas, NumPy, Data Cleaning, Data Preprocessing

Data Visualization: Matplotlib, Seaborn

Machine Learning Techniques: SMOTENC, GridSearchCV, Stratified Group K-Fold, Hyperparameter Tuning

Evaluation Metrics: Accuracy, Precision, Recall, F1-score, ROC-AUC

Version Control: Git, GitHub

Networking & Systems: CCNA fundamentals, MCSA fundamentals

CERTIFICATIONS & COURSES

CCNA (Cisco Certified Network Associate) — IT Gate — Completed

MCSA (Microsoft Certified Solutions Associate) — IT Gate — Completed

PROJECTS

COVID-19 Survival Prediction — Machine Learning Project

- Built a Random Forest Classifier to predict patient survival/death based on medical data.
- Performed data cleaning, preprocessing, and analysis using Pandas and NumPy.
- Visualized data and model results using Matplotlib and Seaborn.
- Handled class imbalance using SMOTENC.
- Applied Stratified Group K-Fold and GridSearchCV for robust evaluation and hyperparameter tuning.
- Evaluated model performance using Accuracy, Precision, Recall, F1-score, and ROC-AUC.
- GitHub: github.com/eng-Mo3aZzz

SOFT SKILLS

Analytical Thinking | Problem Solving | Teamwork | Time Management | Continuous Learning
